

Harshit Garg

8448668035 | Greater Noida, India | harshitgarg.10042008@gmail.com | github.com/harshitgarg10042008-oss

PROFESSIONAL SUMMARY

Computer Science undergraduate and full-stack developer building production-oriented web applications and AI-assisted systems. Experienced with JavaScript, TypeScript, Python, React, Node.js, Express, REST APIs, PostgreSQL, computer vision, speech analysis, GitHub integrations, and cloud deployment; seeking software engineering internships and entry-level roles.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C++ | **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, Django, Spring Boot, FastAPI, REST APIs, tRPC | **Data:** PostgreSQL, MySQL/TiDB, SQLite, Supabase, MinIO
- **AI:** PyTorch, OpenAI Whisper, MediaPipe, CLIP/BLIP/ViT, face recognition, speech analysis
- **Engineering:** Git, GitHub, JWT, bcrypt, RBAC, input validation, rate limiting, Helmet, RabbitMQ, Redis/BullMQ, Docker, Render, Vercel, DSA, OOP

SELECTED PROJECTS

Full-Stack Developer, DriftIQ — Cloud Storage SaaS

<https://driftiq-seven.vercel.app>

- Built and deployed a cloud-storage SaaS using Telegram Bot API for file storage and Supabase PostgreSQL for metadata; delivered 30+ REST endpoints across authentication, files, folders, sharing, and administration.
- Implemented JWT/bcrypt authentication, row-level security, rate limiting, input validation, Helmet hardening, nested folders, expiring password-protected sharing, analytics, and admin tools.

Full-Stack / AI Project, ClassSight — AI-Assisted Attendance <https://github.com/harshitgarg10042008-oss/ClassSight>

- Built an auditable workflow for faculty authentication, class selection, image capture, face recognition, confidence signals, human review, and attendance finalization.
- Designed modular services with Next.js, Spring Boot, FastAPI, PostgreSQL, MinIO, RabbitMQ, RTSP, and FFmpeg; implemented quality warnings, duplicate detection, audit structures, CSV export, and an ERP-ready boundary.

Full-Stack / AI Project, DBOps-AI — PostgreSQL Operations Control Plane <https://github.com/harshitgarg10042008-oss/DBOps-AI>

- Developed a schema-grounded assistant that converts natural-language database questions into structured SQL proposals with deterministic read-only policy validation and EXPLAIN cost review.
- Implemented bounded read-only execution, timeouts, encrypted connection records, schema cataloging, performance and security findings, evidence-based explanations, and append-only audit events using React, Express, tRPC, Drizzle, and PostgreSQL.

Full-Stack / Developer Productivity, DevFlow AI — GitHub Pull-Request Intelligence <https://github.com/harshitgarg10042008-oss/DevFlow-AI>

- Built a GitHub-connected platform that synchronizes branches, commits, pull requests, and review history into a workspace dashboard with deterministic pre-checks and optional AI-assisted review.
- Added risk/severity categories, finding lifecycles, feedback, notifications, webhook tracking, GitHub OAuth, and reliability, authentication, integration, and review-quality tests using React, Express, tRPC, Drizzle, MySQL/TiDB, and Redis/BullMQ.

AI / Full-Stack Project, Persona — AI Interview Assessment Platform

<https://persona-app-sw4b.onrender.com>

- Developing an AI interview platform that analyzes video, audio, and resumes for structured feedback on posture, gestures, eye contact, attire, speech fluency, and career readiness.
- Designed MediaPipe and CLIP/BLIP/ViT computer-vision pipelines, Whisper speech analysis, adaptive interviews, role-play and panel modes, CV replay, STAR feedback, job matching, and placement-readiness prediction.

EDUCATION

Greater Noida Institute of Technology — B.Tech, Computer Science and Engineering | Expected Graduation: 2029
